Diagrams

Figure 1: Finite Automaton that accepts only those words that **do not** end in *ba*

Source Code

Listing 1 A Go code block

```
import "fmt"

func main() {
    fmt.Println("Hello, word! → ⇒ ≤ ≥ ≠")
}
```

Math Equations

$$x_{1,2} = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$
