List of Figures

1	Finite Automaton that accepts only those words that do not end in <i>ba</i>	2
---	--	---

List of Tables

Source Code

- lst. 1:

Listing 1 A Go code block

```
import "fmt"

func main() {
    fmt.Println("Hello, word! -> => <= >= !=")
}
```

- lst. 2

Listing 2 A Rust code block

```
fn main() {
    println!("Hello, word! -> => <= >= !=")
}
```

Math Equations

$$x_{1,2} = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

Diagrams

TikZ diagram:

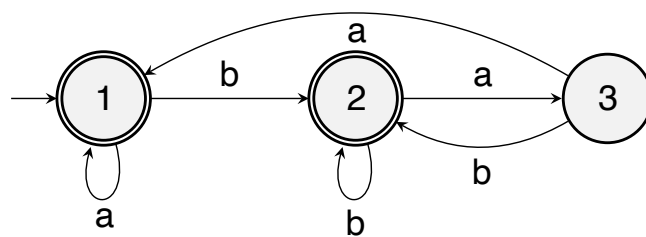

Figure 1: Finite Automaton that accepts only those words that **do not** end in ba
